Sadbhav Futuretech

The Sanskrit word *sadbhāva* (सद्भाव) is a combination of the words *sat* (good) and *bhāva* (quality). So, *Sadbhāva* has multiple meanings – the most prominent translation for us was, ‘goodwill’ - a friendly or helpful attitude towards others. Sadbhav Futuretech was created to embody the philosophy of this goodwill – and we are dedicated to empowering rural and semi-urban India through sustainable energy solutions. By harnessing clean and green energy, we aim to improve agricultural productivity, enhance livelihoods, and contribute to a greener future for our communities.

Our Inspiration

Many ancient civilizations have worshipped the Sun. From the Egyptians, Greek, Inca, Persians, Babylonians, Sumerians, Celtic, Japanese, Chinese ... the ancient people have acknowledged and worshipped the life giving power of the Sun God. In Hinduism; *Surya* is the source of life, time, and cosmic order. According to the *Rig Veda*, *Surya* is born from the cosmic egg or *Hiranyagarbha* and drives away darkness. With a golden body, radiating light and energy, worshipped as a visible form of the divine who removes ignorance - *Surya* is the driving force behind the movement of the planets and the cycles of day and night. At Sadbhav, our journey began with a prayer to the life-giving *Aditya*, the one who sustains all. The one who is a friend to all. May we be guided in our journey of goodwill and sustainability by the power of he who sustains all!

ōṃ mitrāya namaḥ

(Praise the one who is a friend to all)

About Us

We are **Sadbhav Futuretech** - a pioneer in the Indian agricultural industry, providing end to end solutions for farmers using the fuel of the future – Solar. We create value for our stakeholders using our technology driven and fully integrated agricultural solutions.

Our solutions stack is powered by passionate leaders with vast and valuable solar industry expertise - from Large Scale Projects to Solar Agricultural Pumps and Solar Rooftop Systems. Sadbhav has also pioneered India's first 'Same as Cash' mechanism for all types of Solar Power Projects.

Aiming to create massive socio-economic impact, Sadbhav are on a mission to become the the agri-renewable platform of choice - for the people of India.

PM-KUSUM: Our Guide

A commitment was made in Paris Climate Agreement in 2015 to have **50%** of installed power generation capacity from **non-fossil fuel** sources by **2030**. So, to provide **energy and water security** to farmers and enhance their **income**, **de-dieselise** the farm sector, and **reduce environmental pollution**, the GoI launched the **PM-KUSUM** (Pradhan Mantri Kisan Urja Suraksha Evam Utthaan Mahabhiyan) in February 2019. The three components of the scheme:

- Addition of **10,000 MW** of solar capacity through installation of small solar power plants (upto 2 MW)
- Installation of **20 lakh** standalone **solar powered agricultural pumps**
- Solarisation of **15 lakh** existing **Grid-connected Agriculture Pumps**

One of the largest initiatives of the world to provide clean energy to >35 lakhs farmers by solarising their agriculture pumps

Employment generation potential

- Around **24.50 job-years** created per **MW** of small capacity solar installation
- Self-employment opportunity
- Scheme is likely to generate **employment opportunities equivalent to 7.55 lakh job-years** for **skilled and unskilled workers**

Our Business

Solar as a Service

- Solar Irrigation
- Solar Rooftop
- Solar Power Plant

What Sets Us Apart

SAAS Solar as a Service

- Execution is a differentiator for SFL
 - Deep-rooted coverage with sizeable on-ground and last time support network
- End to end to execution as EPC with 3D Design inputs and tech based solutions
- Customised product design solutions
- Ensuring process orientation backed by ISO 9001:2015 certification from TUV
- Committed after-sales service ability
- Strong, extensive & supportive dealer network
- Income for the farmers from their barren lands

The Sadbhav Journey

We are on track to make our dream a reality. The dream of becoming one of the **largest Renewable and Agri-Tech based platforms** in the country **impacting the lives of more than 1 million farmers over the next 10 years**. The journey has been exciting...

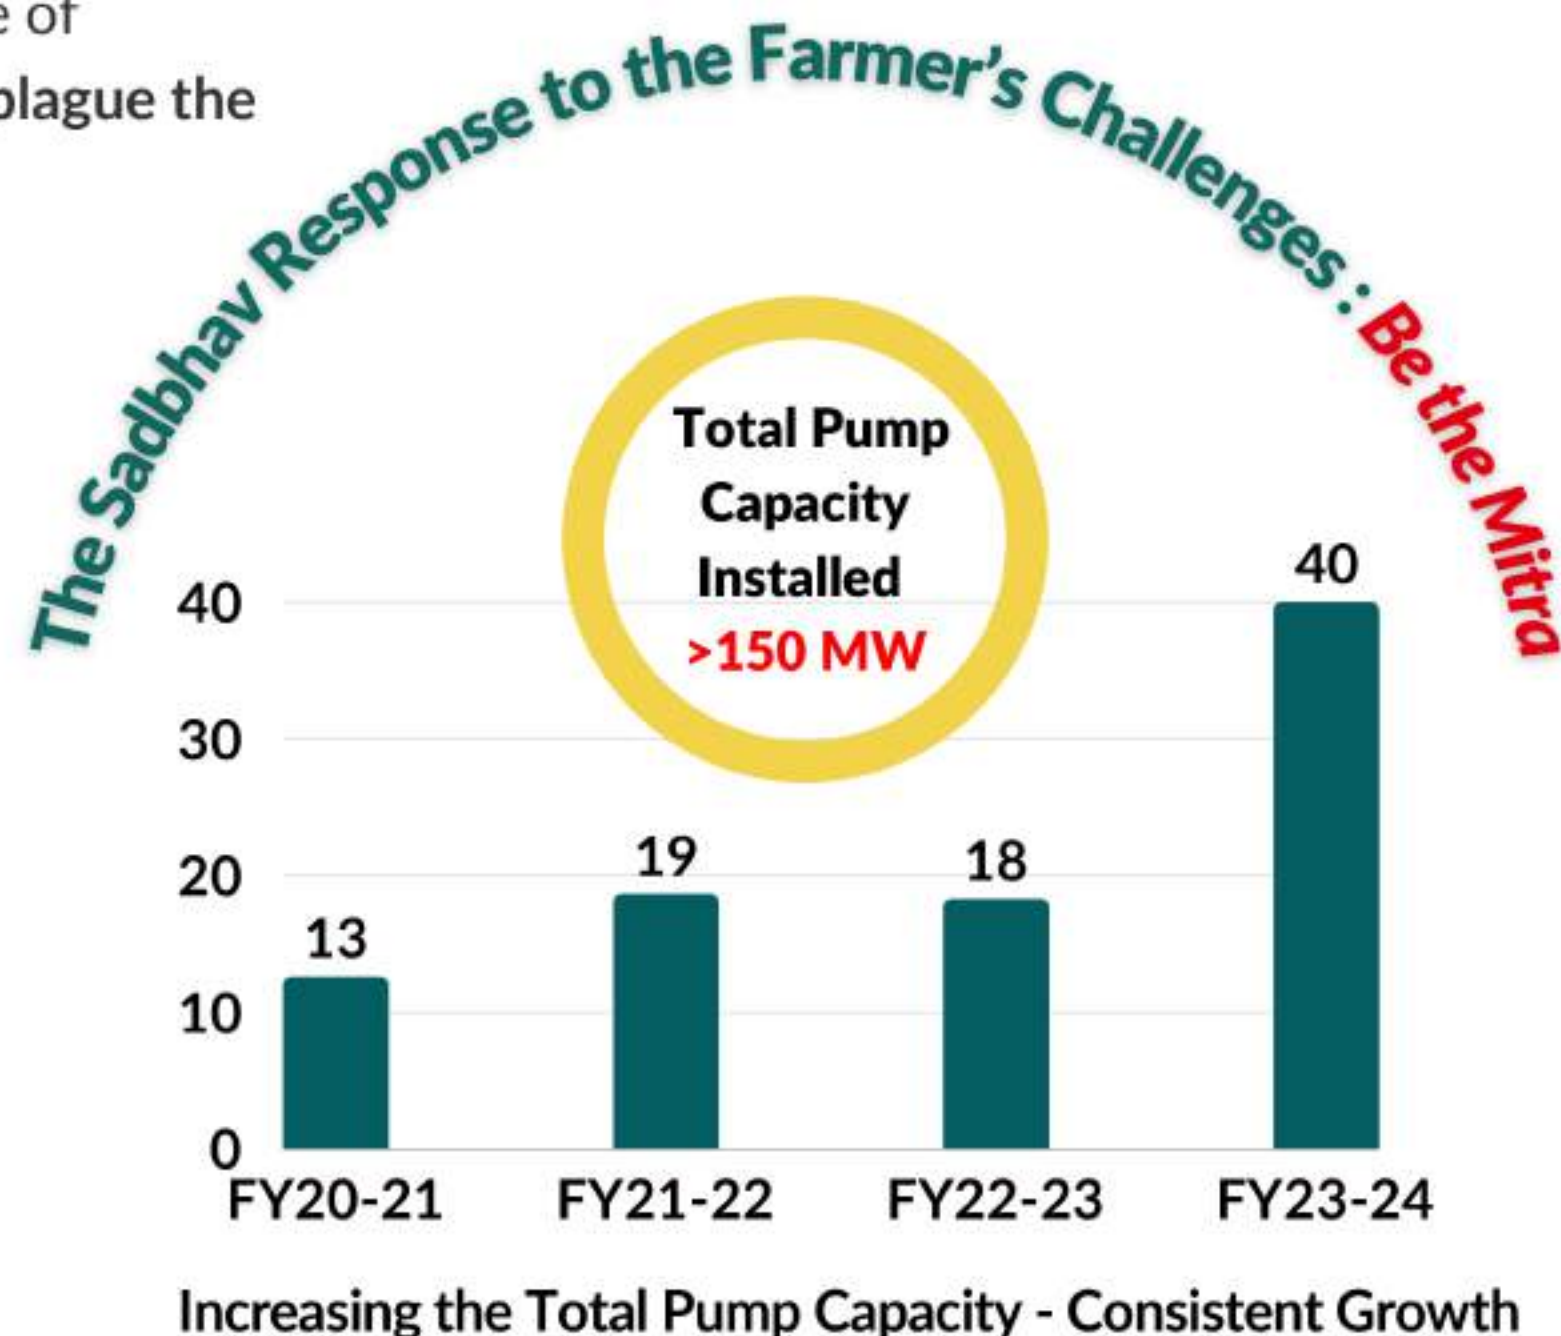

Access to Irrigation : The Solar Story

The Indian farmer's dependence on monsoons has been a constraint on agricultural productivity and livelihoods across India. More than 80% of Indian farmers remain dependent on monsoons for irrigation. And inspite of availability of water, **unreliable supply of electricity** continues to plague the farmers. Sadbhav can help...

Access to solar powered water pumps have the potential to reduce costs, and provide better planning capability to farmers .

The Sadbhav Support leads to Growth

Tapping Sustainable Potential - **Consistently**

The Number of Solar Pumps Installed

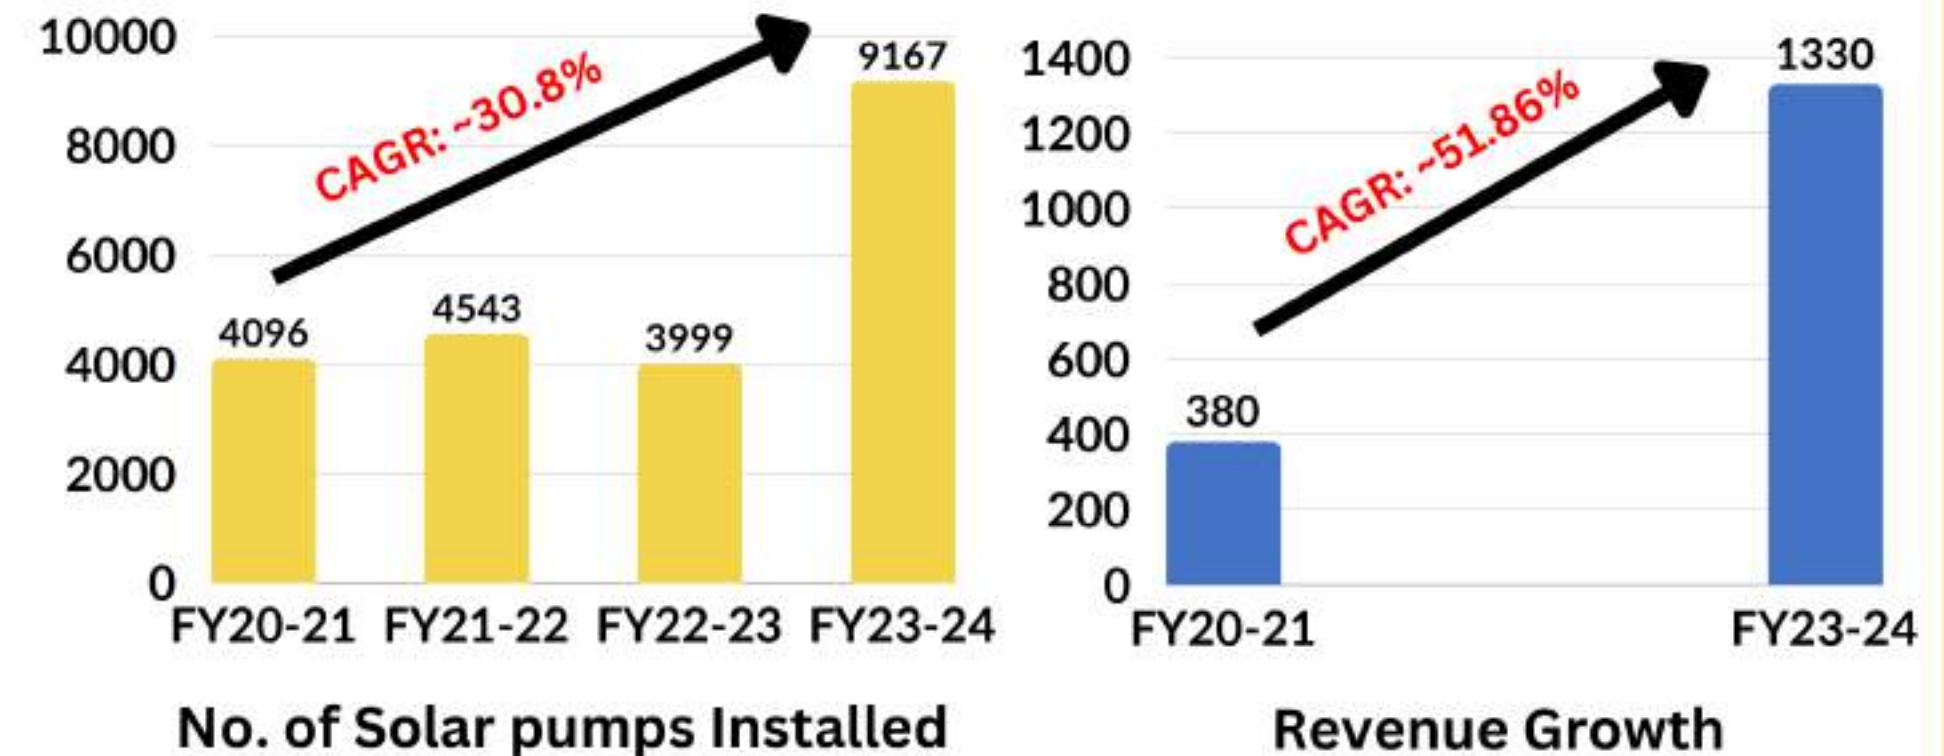

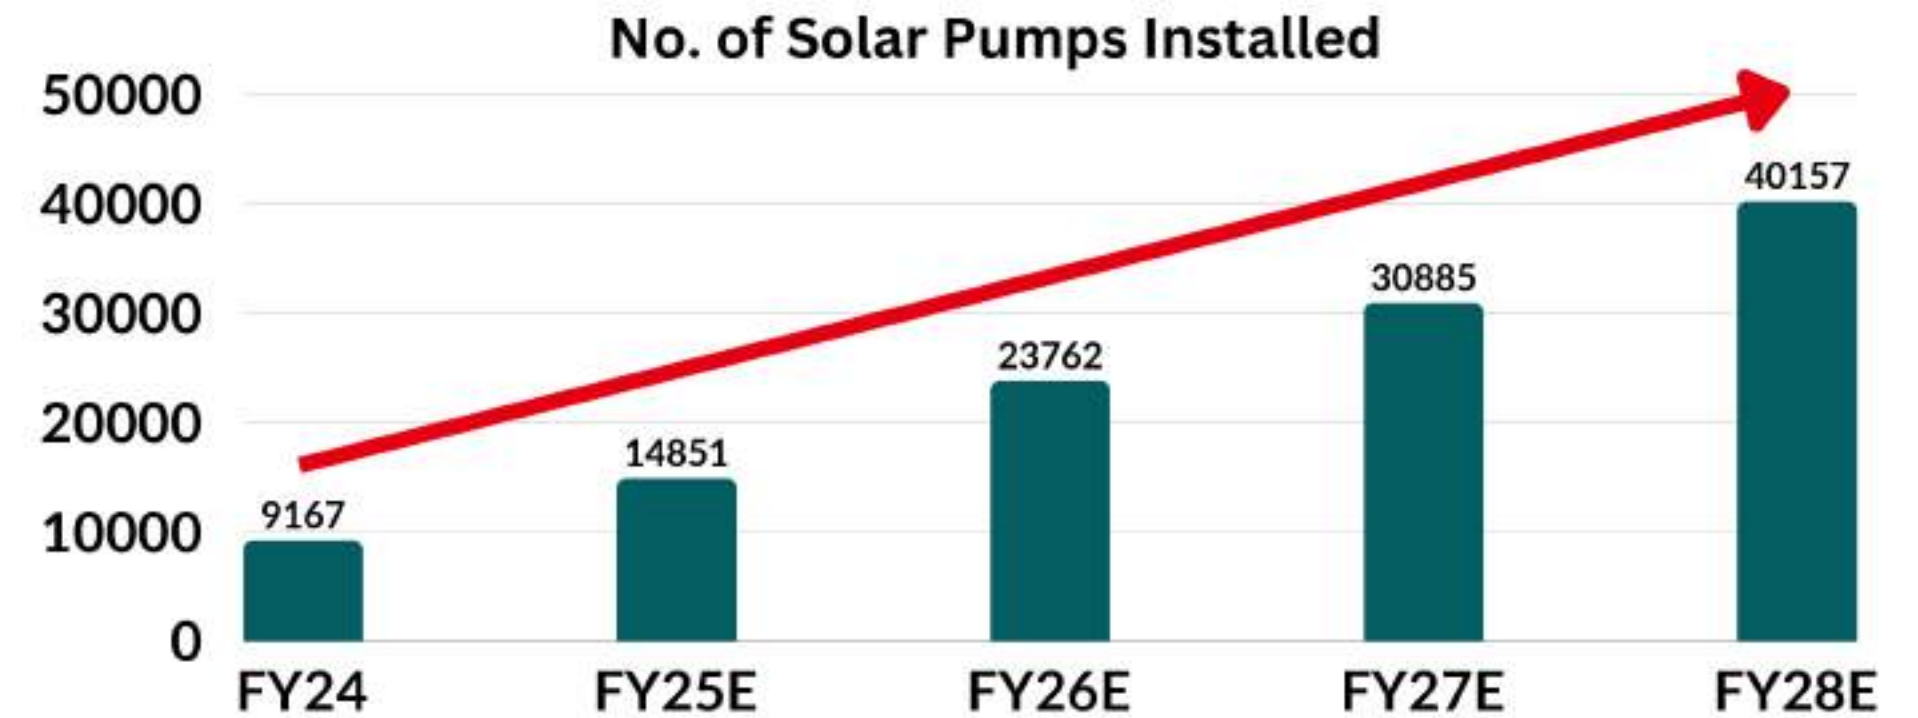

As the installation of solar pumps demonstrates savings and planful irrigation capabilities, the demand continues to grow...

Return on Investment

The demand for affordable green energy solutions is not just smart for the farmers - there is tremendous potential to deliver returns to investors. The solar growth story is just beginning...

Customer Satisfaction

Sadbhav's Network of >100 Installation partners across Haryana & Maharashtra with linkages to ~700 Common Service centres - ensures complete customer satisfaction - ensuring growth potential

The Sadbhav Footprint across India

2021

- Haryana
- Chattisgarh

Network

Network of >100 Installation partners across Haryana & Maharashtra with linkages to ~700 Common Service centres

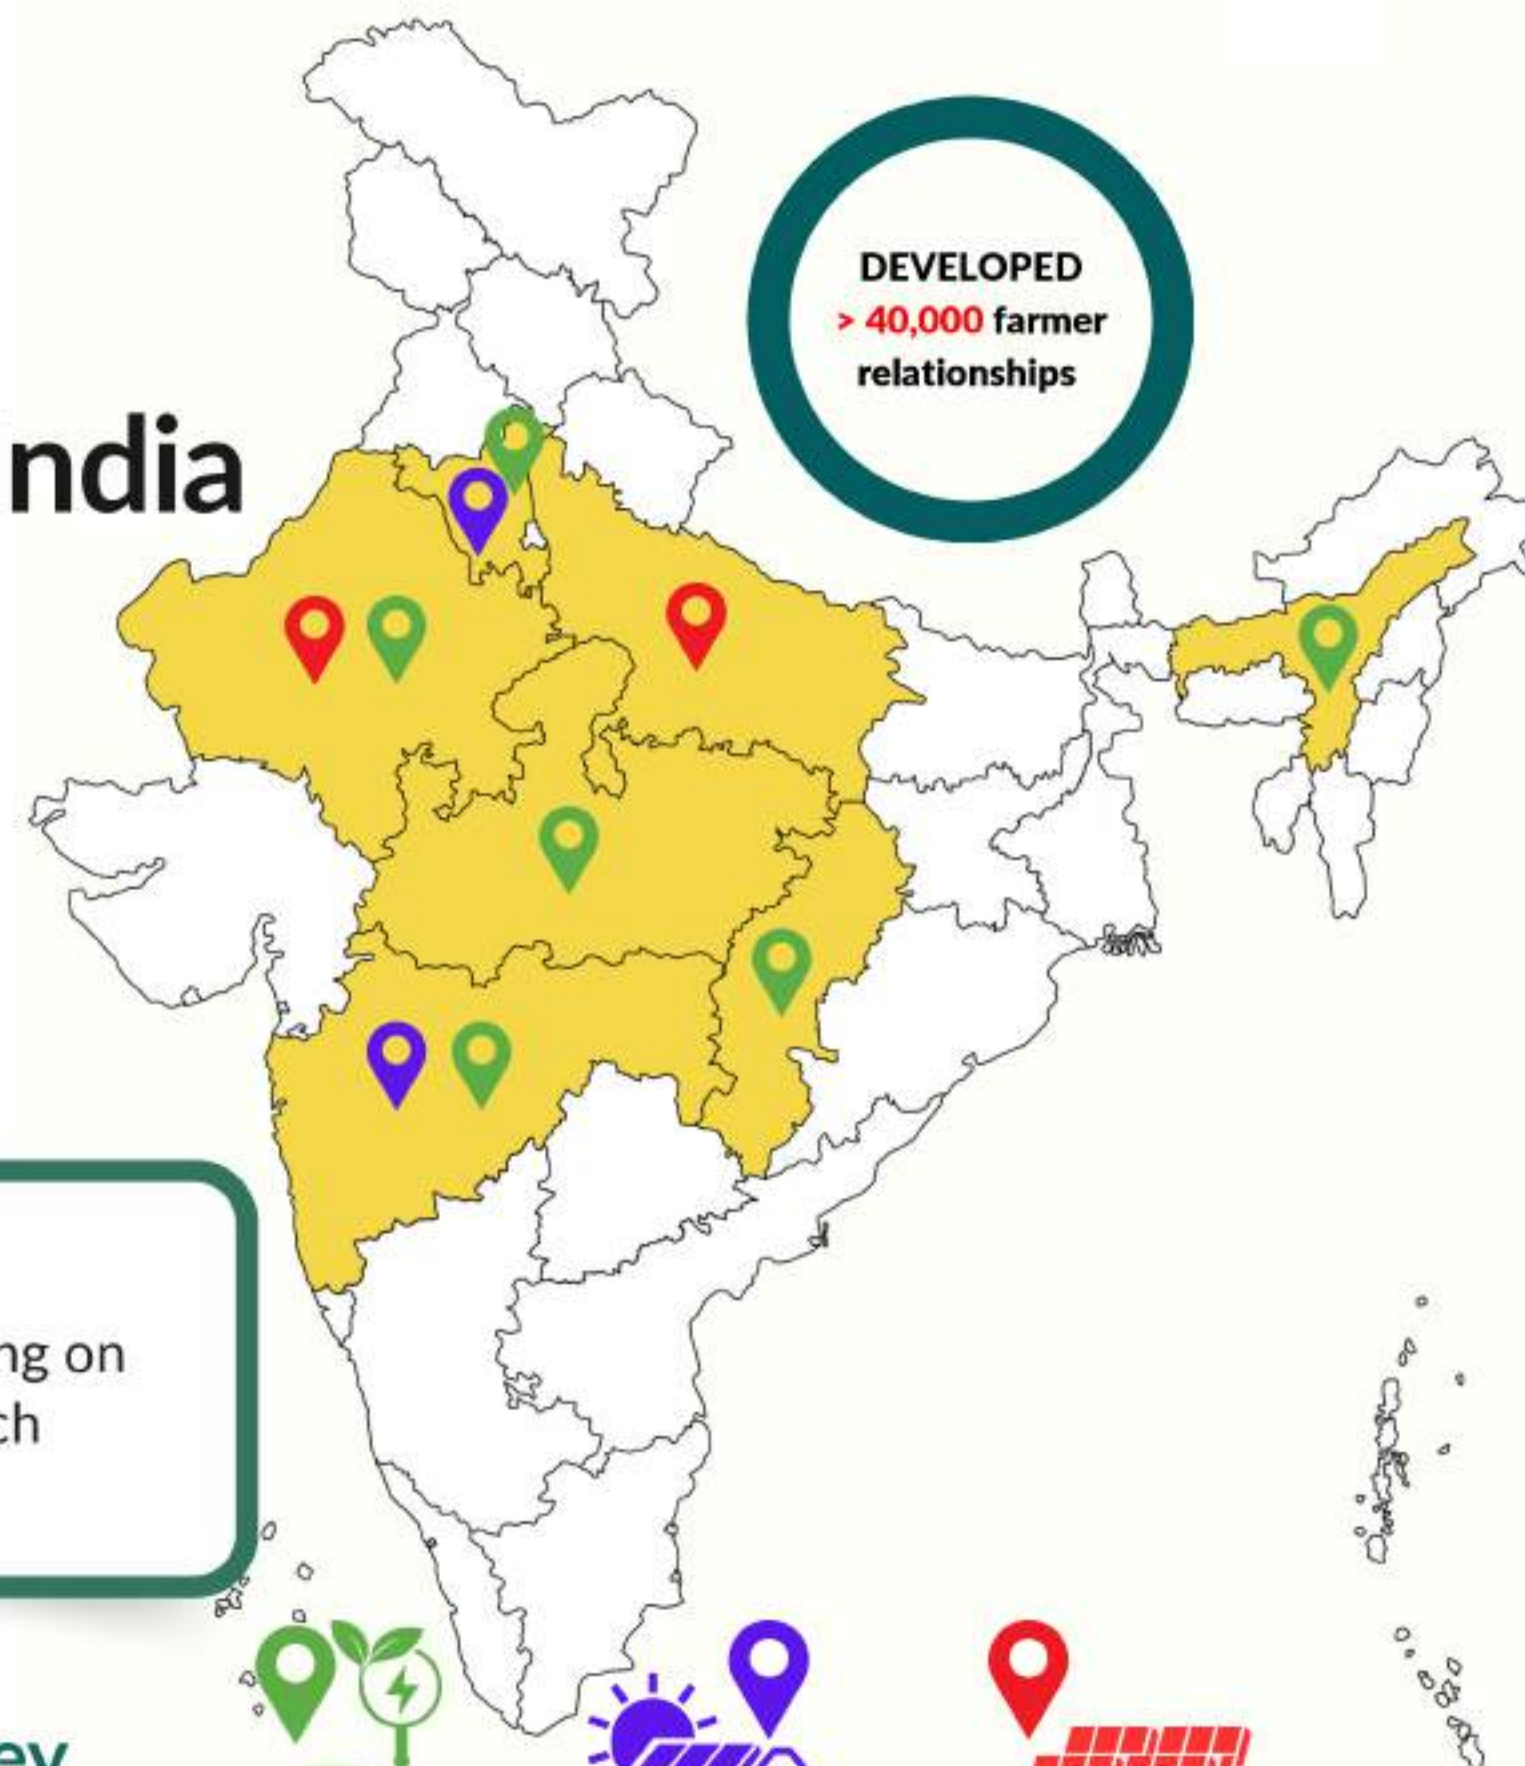

2024

- Uttar Pradesh
- Madhya Pradesh

- Assam

Network

More than 900 people working on ground for SadbhavFuturetech

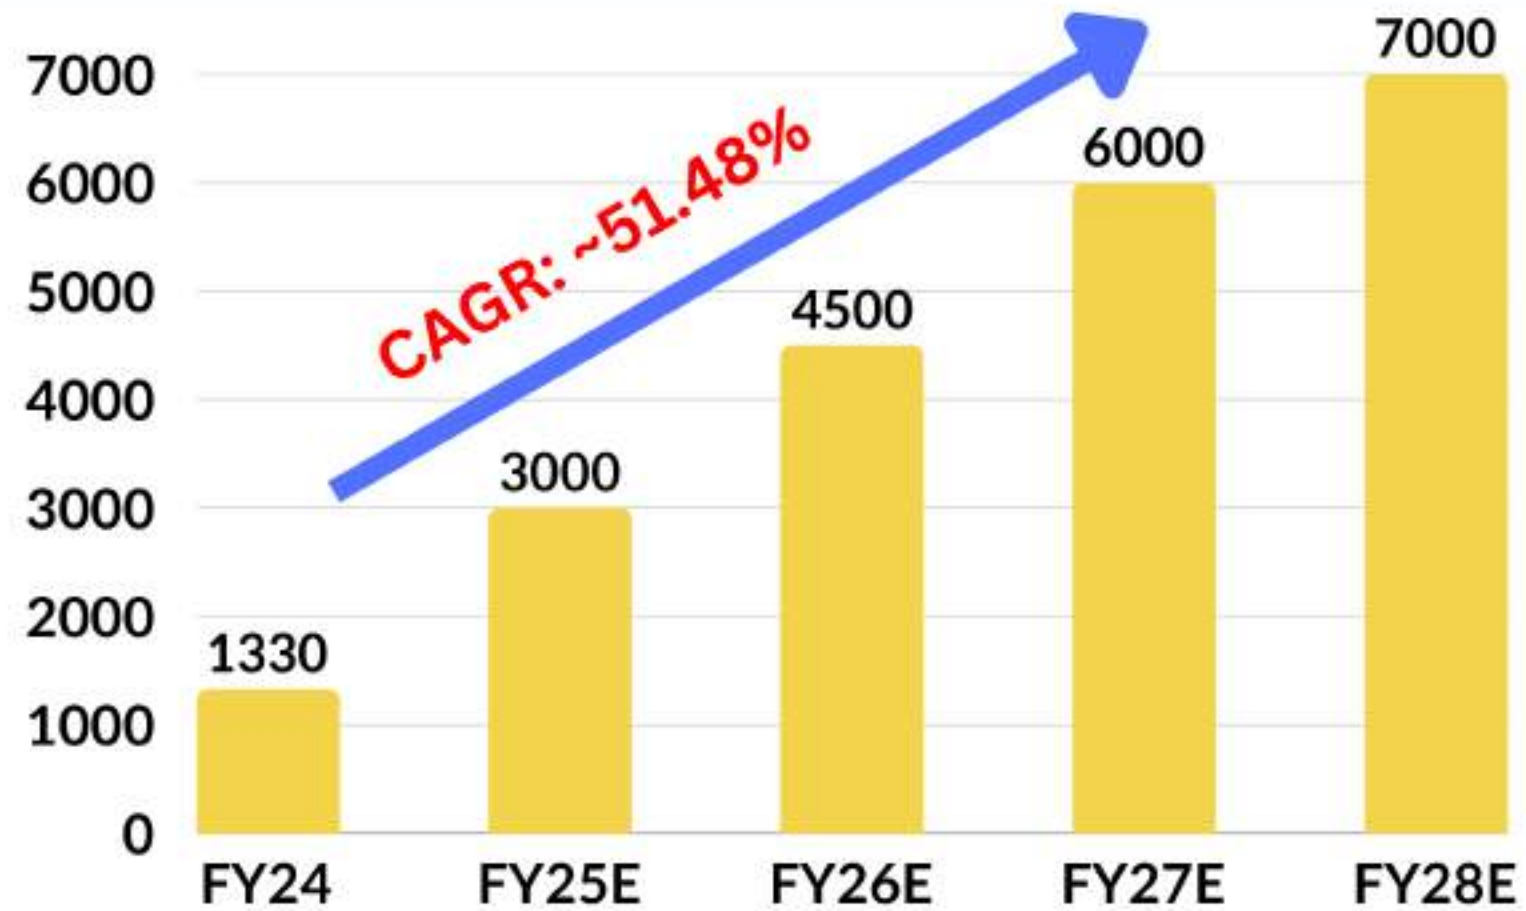

Customer Satisfaction continues to power our journey...

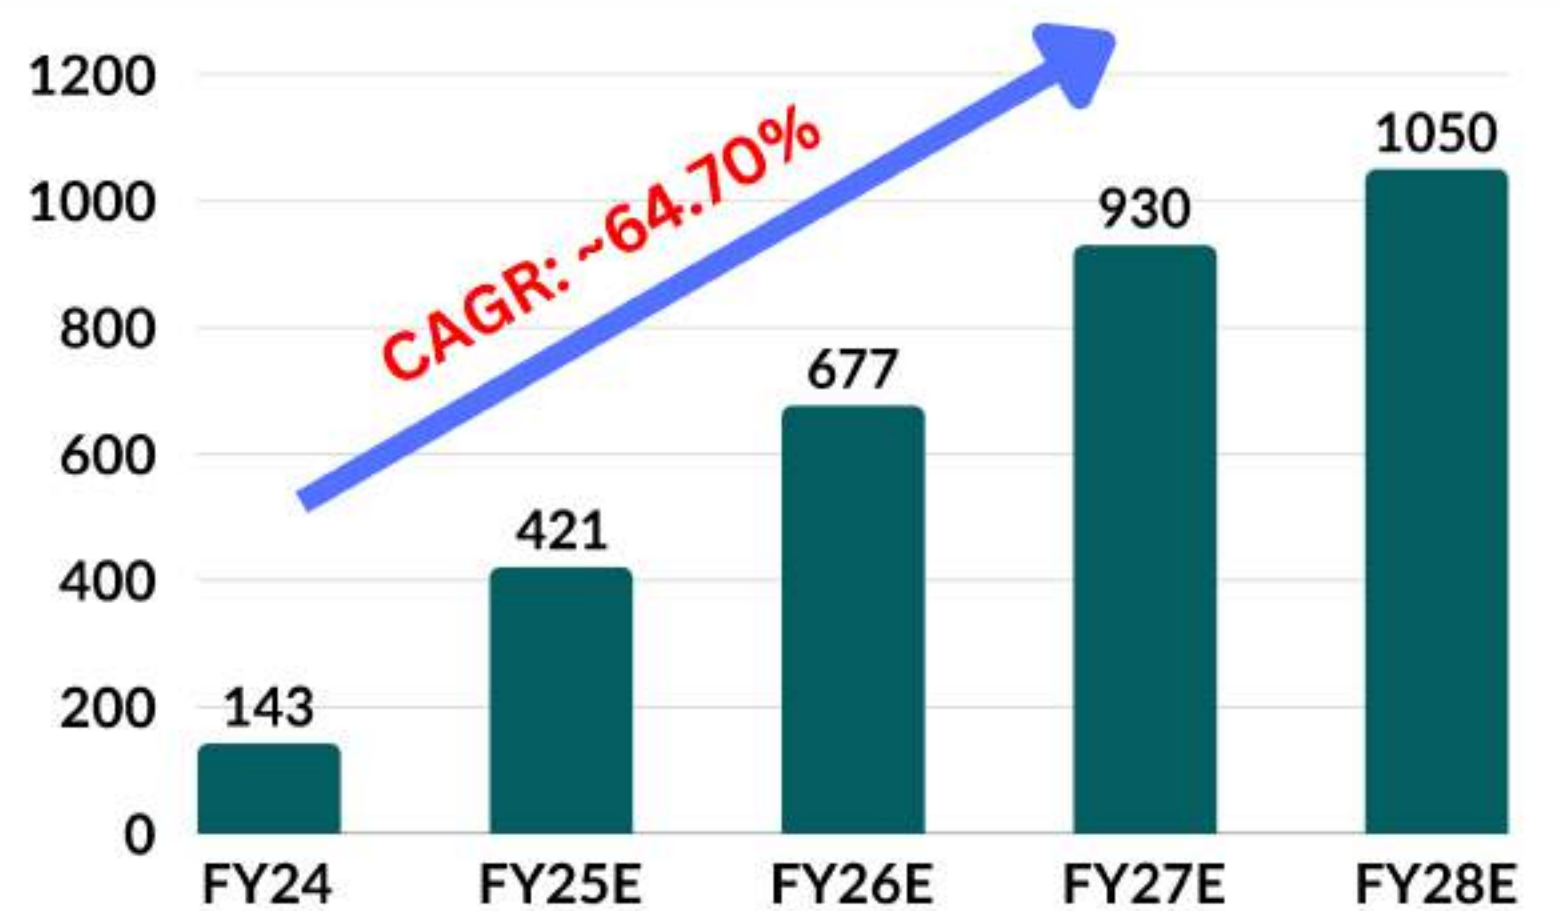

The Numbers Speak

Our Numbers Speak... The Potential is REAL

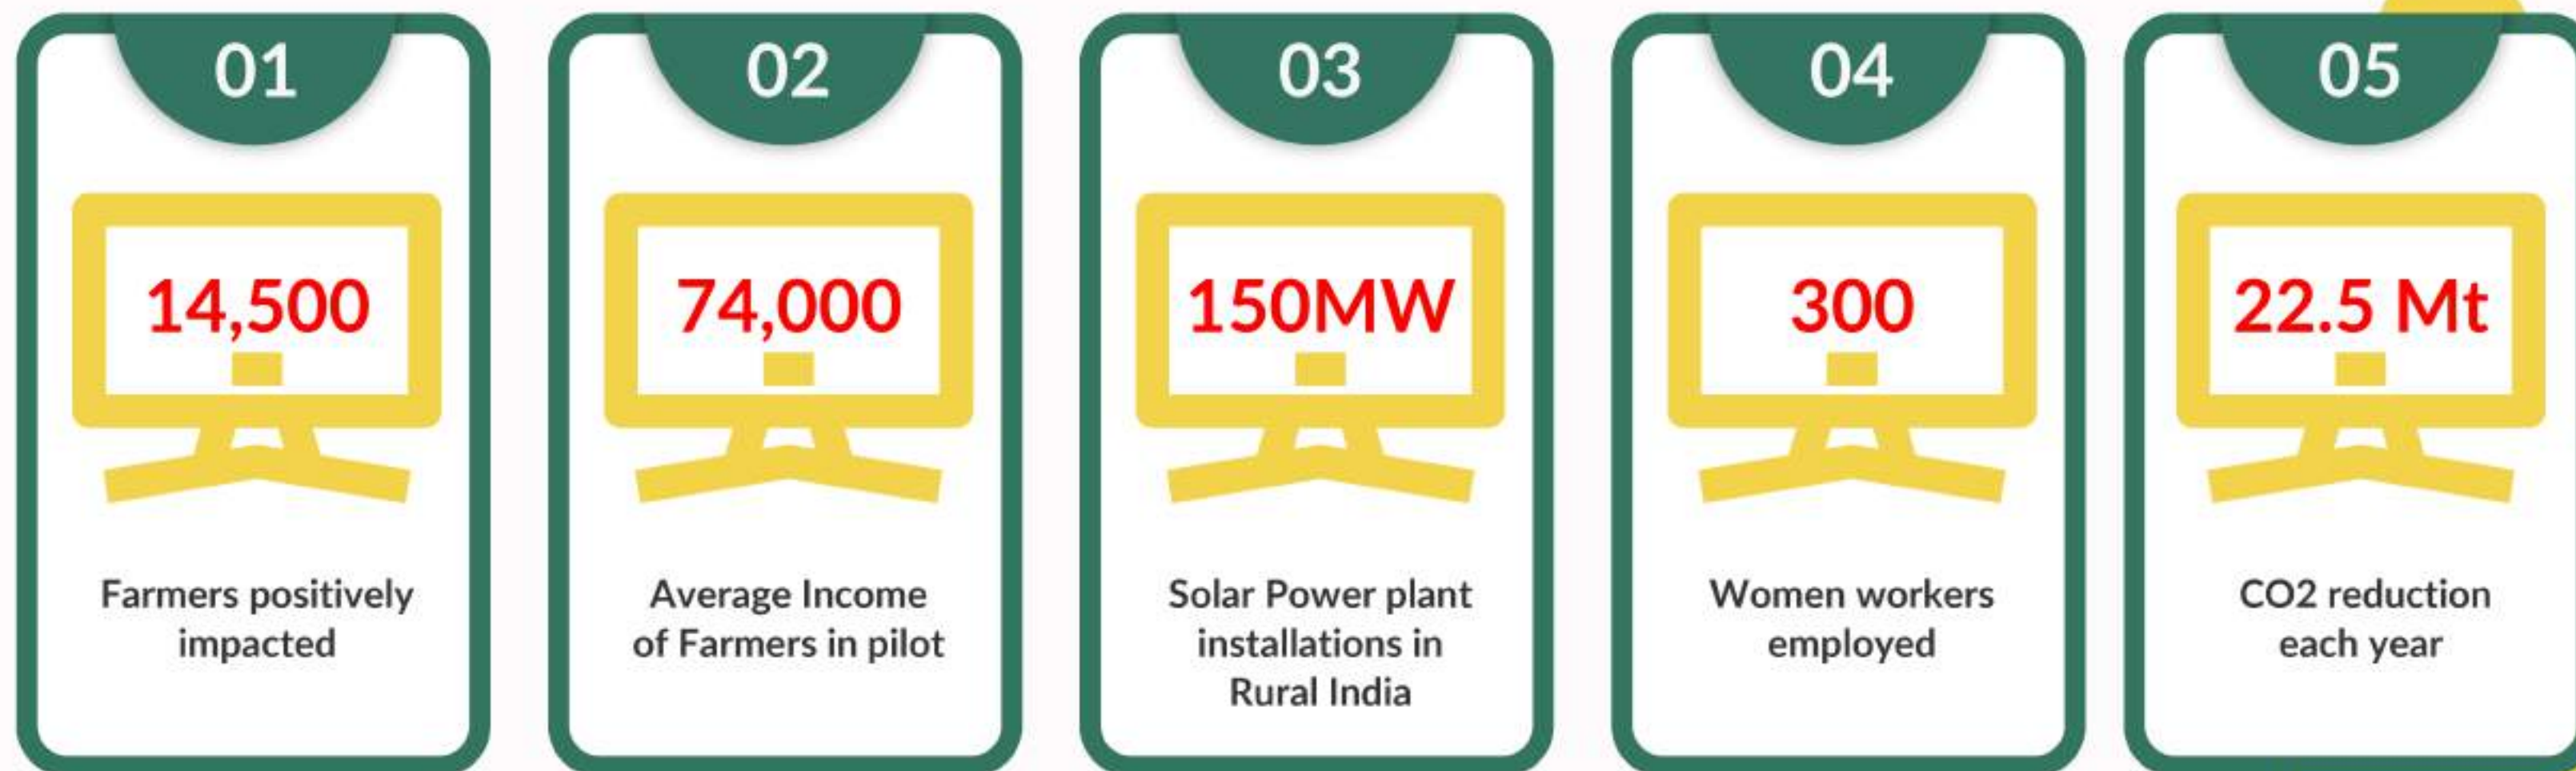

Revenue (INR Mn)

Profit Before Tax (INR Mn)

The Sadbhav IMPACT

The name was not just a name - but an inspiration. And we have not lost sight of the higher goal. In our journey so far, we have gone beyond the carbon footprint ...

The Journey Ahead...

Sustained Growth & Profitability

What The Next 5 Years Look Like

The Immediate Target

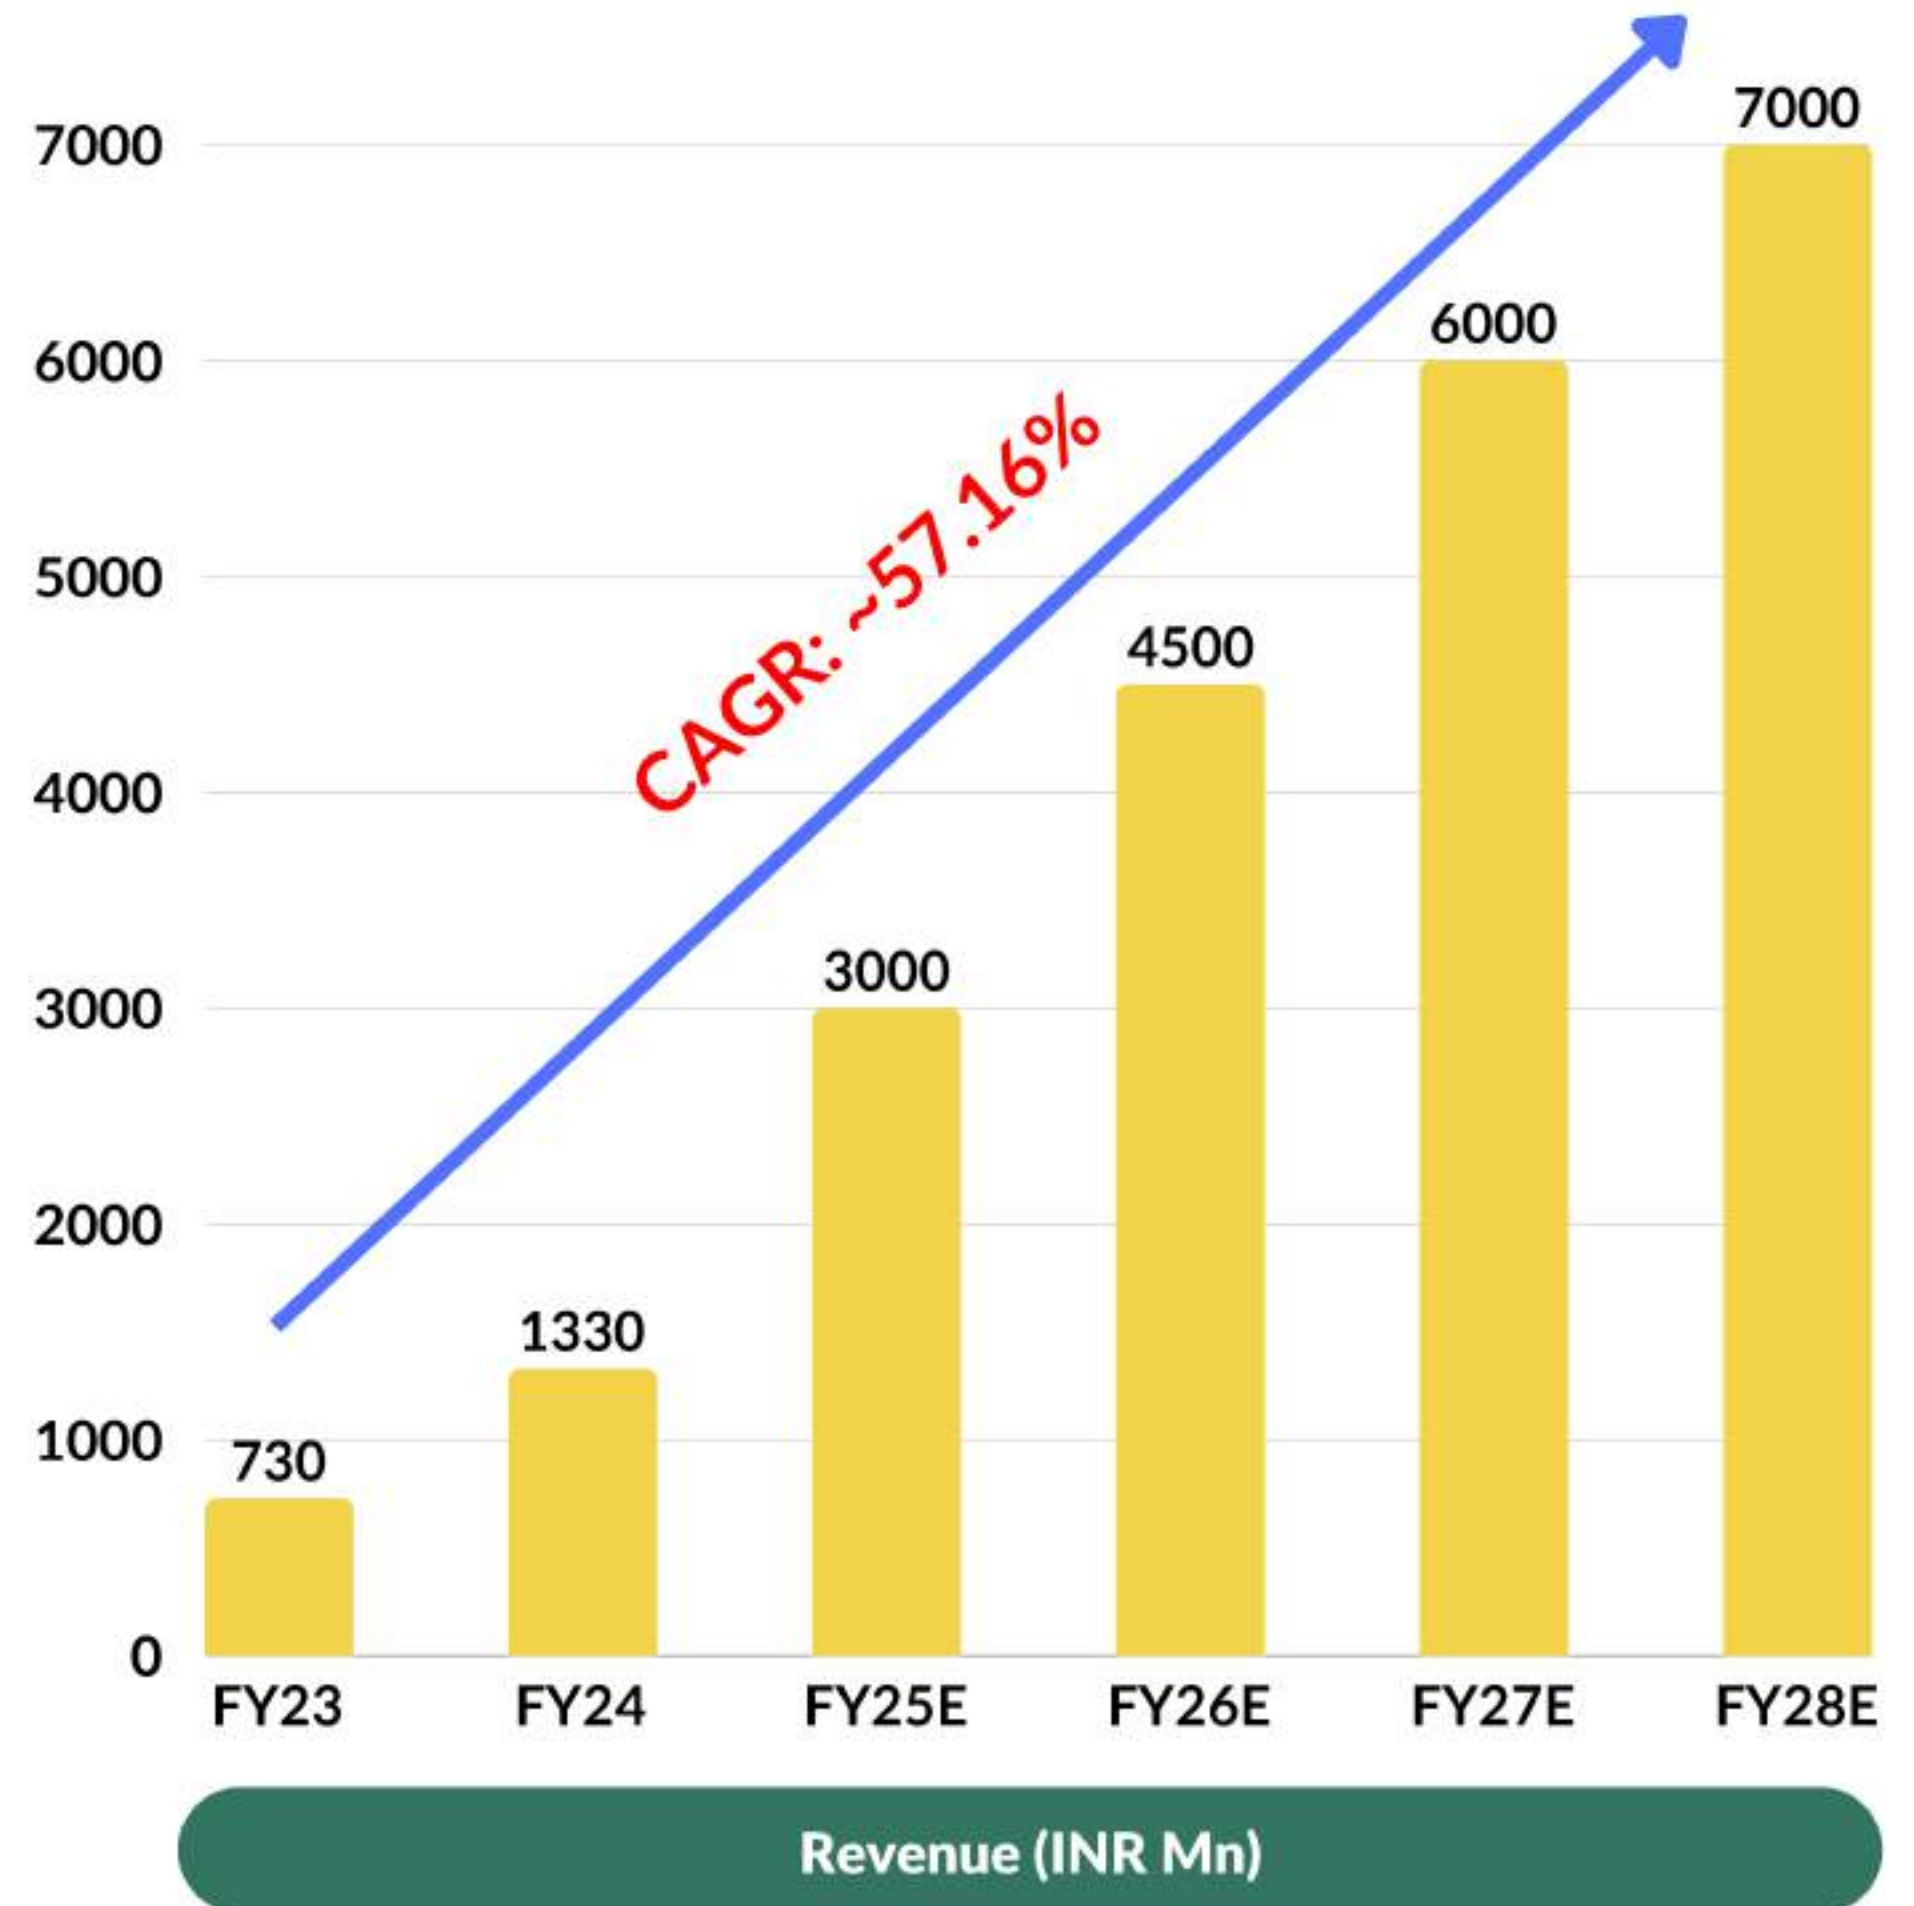

- 130,000 Solar pumps (cumulative) in the next 5 years
- A Billion Dollar *Made in India* success story by 2028

Return on Investment

- **10x** business growth by 2028

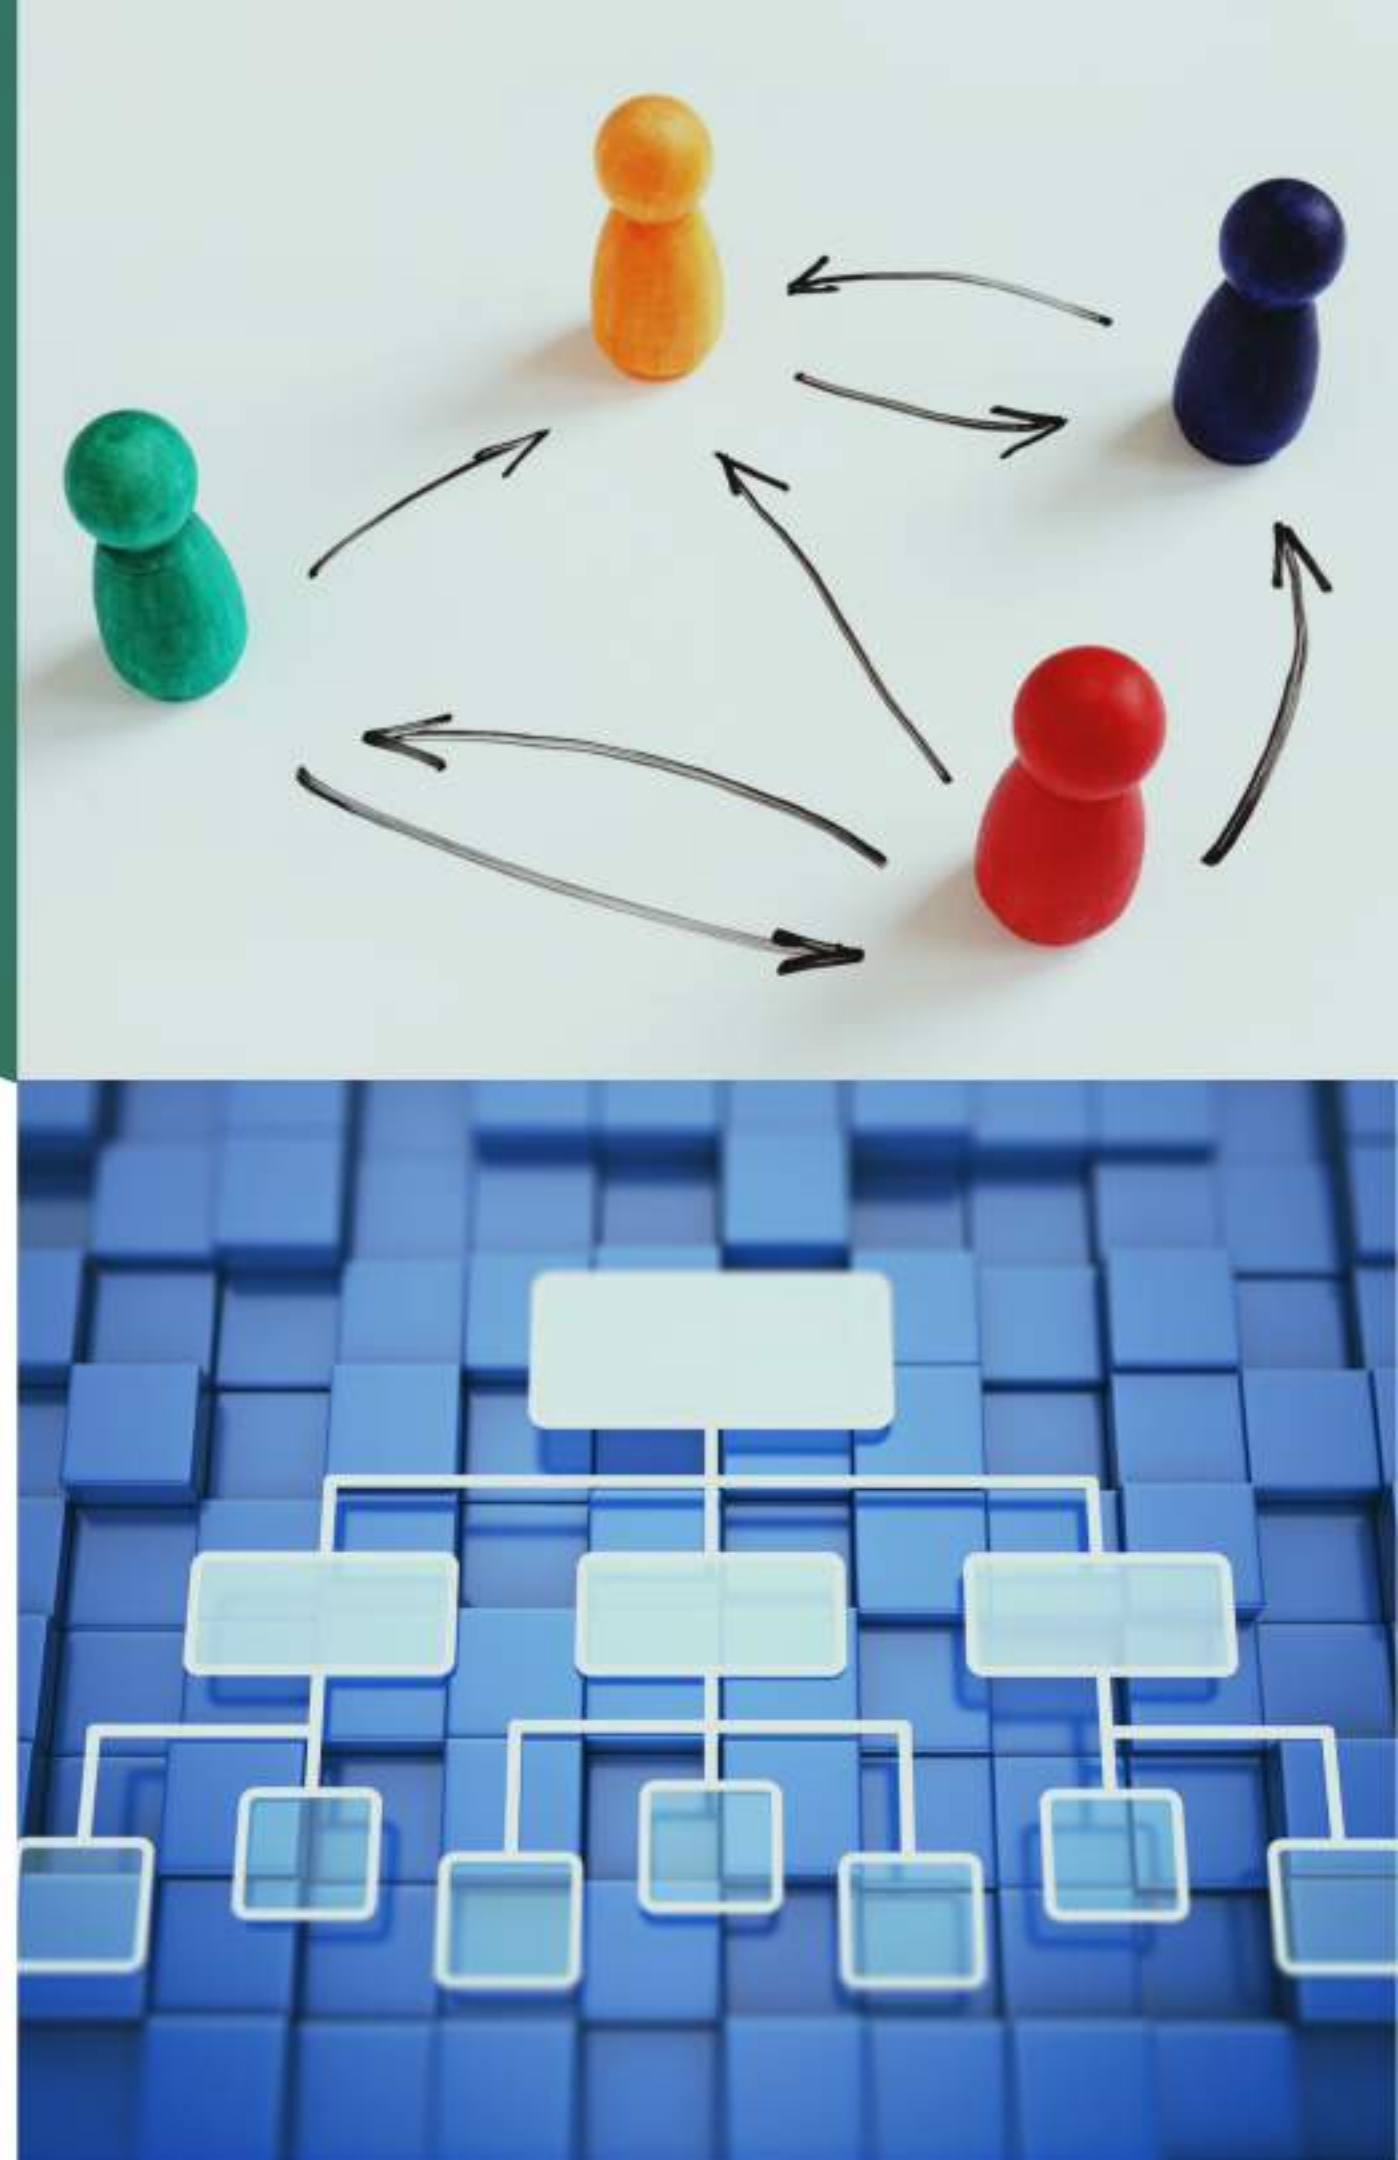

The Vision

To be the Largest player in Solar Pumping and Solar Rooftop space in India with over 200MW Solar Rooftop projects in **2025!**

The Secrets of our **sustainable** success

- **The Intent**
 - Good intentions leads to good outcomes
- **Management Team**
 - The founders are reputed industry experts with extensive experience - enjoy market's trust
- **The Focus on Future - potential**
 - Solar is a Sunrise Industry
 - Backing of government commitment to promoting sustainable energy, food security
- **Remaining Grounded**
 - Sadbhav's forecasts are based on orders
- **Creating a Strong Organisation Structure**
 - Right people in the right place already

Bhupender

“Why Did I Start Sadbhav?”

My roots lie in the land that is core to the Sadbhav story - the rural heartland of India. I grew up in a small village in Haryana, where I completed my junior school education. I understand our core customer base - the farmer. His hopes, dreams, and visions of a better future for his children, as well as his angst, fears, challenges. Having left for a brighter future myself, yet still tied to

my land; I was looking for an opportunity to **empower farmers**, ensuring their hopes and dreams become a reality. The **Sadbhav business model** offered me the golden opportunity of using my extensive knowledge, and vast experience of the agriculture value chain to offer **value creation for the farmers**. We have the potential to scale up, reduce produce wastage, assure better returns, and create jobs at the rural level to ensure that our **villages become promising** to the citizens of tomorrow. I truly believe the ‘**bright future**’ of India lies in also beyond the cities! The vision of crafting **that growth story**, is why I started Sadbhav Futuretech.

Nilesh

“Why Did I Start Sadbhav?”

In a nutshell, I am ‘**numbers**’ guy! With over 25 years in Project Finance and Debt Syndication, and expertise in strategic financial advisory across diverse industries; I understand what makes a company **successful** - from the perspective of **all stakeholders**. From the customer, the marketplace, the government, the investor, the employees. When I saw the opportunity to start a

hungry (yet grounded) company in the Sunrise industry, led by experienced experts with sterling reputation and equity in the market (and among all stakeholders); I came aboard. It is rare to find a company today, which has remained profitable right from the first year of operations - Sadbhav still maintains the track record! Still primarily **bootstrapped**, and **averse to cash burn**, all promoters are committed to maintaining focus on the big picture - growing a sustainable business aimed at value creation across the chain. With **year-on-year growth of 250%**, we remain **on track** for achieving our goals. The potential is immense, and the journey has just begun...

“Why Did I Start Sadbhav?”

A nation brimming with youthful energy and potential, India is poised to become a global economic powerhouse. India emerged as the fastest growing major economy in the world in 2024, with projected growth at 7% for 2024 and 6.5% in 2025. However, forecasts mean little if the heart of India - the growing population of educated youth with dreams of a better tomorrow - continues to leave their lands in search of sustenance! It is my conviction that the land of opportunity, the true wealth of potential - lies in our rural India. We only need to change our perspective. As an investor, I felt that I needed to invest in the true potential of India - the youth. I needed to **create jobs, and demonstrate value creation**, - so that they also believe, and become a part of this **growth story**. They did. **Sadbhav has been profitable since Day 01!** And we **continue on the sustainable growth track** - powered on by hopes, dreams and a desire to prove a valuable point; ... and backed by consistent performance - not just meeting, but exceeding expectations!

Bhupender Singh

Director

An accomplished professional with 20+years experience in strategy, sales & operations, Bhupinder previously held strategic positions in renowned logistics organizations like Snowman Logistics, Future Supply Chain, V-Trans, Gati & Relogistics. He set up Ravi Integrated Logistics for the erstwhile Rana Kapoor owned Family Office. Bhupender completed his M.Sc in Mathematics and PGDBA from PT University.

Nilesh Jain

Director

Nilesh Jain, FCA, is a name to be reckoned in the field of Corporate Finance & Management Consultancy at Chhattisgarh with expertise in debt financing. He has one of the largest CA practices in Raipur. Associated with more than 100 corporates in various fields i.e. Iron & steel, Health Sector, Trading, Retail, Logistic Industry, Warehousing & Cold Storage, Rice Mills & other Food Industry, Export & Import etc.

Saikat Roy

Director

Saikat has over 22 years of experience in multi disciplinary functions across various sectors and is a keen strategist. He was instrumental in setting up a green field project for the UNO Minda group in the field of energy efficient lighting and one for the erstwhile Rana Kapoor owned Family Office in the field of renewable energy. He set up the Minda Design Studio that started patenting automotive technologies. Saikat holds an MBA from Symbiosis, Pune & B.Tech from BITS, Pilani.
